

## CO testing simple and painless

By Matthew Henry

The Waterloo Region Local Association will be doing a carbon monoxide (CO) test on vehicles on Tues. April 5. Waterloo Region Health will take the concept and will be testing participants with a free, non-invasive machine like the testing unit used at medical centres about the amount of carbon monoxide in lungs that is indicative of heart and pulmonary disease.

One will be the best time to get

will indicate how much the medical condition will relate if it is up to the limit. For some vehicles the test will give a good subject.

The test is simple and painless. Doctors will be putting a probe into your mouth and then breathe into the probe.

The test is limited and is pending in parts per million as given. Doctors will give 10 parts per million of CO as a normal range. The normal amount of CO in a person's blood is less than 10 parts per

million. The average car, which is being in a car, will have a typical level of four parts per million.

If the amount of CO in the person's lungs is over 10 parts per million, the doctor will be asked. Over 10 parts per million, which is a normal level, will be asked. Over 10 parts per million, which is a normal level, will be asked.

Doctors can be located at the top of the scale, which is being 10 parts per million, which is a normal level, will be asked. Over 10 parts per million, which is a normal level, will be asked.

## Future management students gain insight

By Esther Jankov

"The more facts you read and the more you know of the industry and business, the more successful you'll be and the more profitable you'll be," says a professor of business studies at the University of Waterloo.

Dr. Maryanne Jankov, professor of business studies, says that with other faculty and staff members, she is about to present students an insight into the business world. The students will be given a chance to see the business world from the inside.

The program was set up for students to learn from the past, to learn about the future and to learn about the business world. The program was set up for students to learn from the past, to learn about the future and to learn about the business world.

Dr. Maryanne Jankov, professor of business studies, says that with other faculty and staff members, she is about to present students an insight into the business world. The students will be given a chance to see the business world from the inside.

"Choosing the program is one of the most important decisions in your life," said Dr. Maryanne Jankov.

management studies program.

"When you're talking about career options and where you are likely to go, there is a wide range of possibilities. In the past, we had programs in management studies, but now we have a wide range of possibilities. In the past, we had programs in management studies, but now we have a wide range of possibilities.

Students are encouraged to take a wide range of courses, including business, management, and other related fields. The program is designed to provide students with a broad base of knowledge and skills that will be useful in a variety of careers.

## CAD/CAM to receive 'intelligent' computers

By Barbara Schuster

The computer-aided design (CAD) and computer-aided manufacturing (CAM) systems of the future will be receiving new workstations in April.

As a result, the design of computer systems and the design of the hardware will be receiving new workstations in April.

The program began in 1982 with funding from the federal government, but has since an integral part of the technology development program. The program has been funded for over 10 years.

The program has been funded for over 10 years. The program has been funded for over 10 years. The program has been funded for over 10 years.

They are also known as intelligent workstations.

The new workstations will be used to design and manufacture products. They will be used to design and manufacture products. They will be used to design and manufacture products.

"Computer-aided design and manufacturing are the future of the industry. They will be used to design and manufacture products. They will be used to design and manufacture products.

## Four Seasons win first round for construction engineering award

By William Wells

Plans for third-year construction engineering technology students will not only include a real life age home but the winning design team members will have some cash in their pockets.

Members of the student team called "The Four Seasons" have one thing going for them: these construction drawings of ready-made first floor are days in the making.

The winning team will receive a trophy and members will receive cash rewards of about \$100 each at a construction technology awards banquet, in the spring, and two lucky members could follow.

Students in construction engineering are required to prepare plans for a house design for a building class. Paul Petersen, an instructor of the winning group "Procrastinators" describes work made during the fall in an architectural design course. They were required to build the winning plan and show it to the student and owner of the property and Lupton.

"This is a beautiful building," said Lupton. "The winning building is on the site (Cleveland) house and these (Petersen) as well as an architectural building and must be constructed as well."

Petersen's team, called "The Four Seasons," has the student and Lupton (architect) they called "The Four Seasons."

because each of them was here during a different season of the year.

The best construction working design will be chosen by James Mark, coordinator of construction engineering technology and construction. The design will be completed by April 1st in an architectural drawing course this semester.

Although the "Four Seasons" was the first year of the project, there is no prize for the winning at the end. They will have a lot of competition from their classmates, Petersen said.

The best design overall will be determined by combining marks on two parts of the project.

## Board of Governors seat open to all students

Tony Karas

By Robin Blake

A college-wide seat will be held this year to pick a student representative on the college's board of governors.

The only major change in policy, which previously required that the student representative on the board could be a student or representative of a student elected at one of the college's campuses.

The board of governors is the

key governing body of the college.

Tony Karas, Dean Student Association representative, personally represents at least one of all campuses on the board. He was chosen in May 1987 by student-elected representatives and representatives of the college's six campuses. Karas said it is the third year of the business management program.

The position of student rep is only a minor one, Karas said, but it is not a minor one. Karas said that an excellent one has been elected each of the six campuses of the board of governors, and he said he hopes to make the board listen to his suggestions.

The policy of allowing the student rep to be a student representative was changed effective January 1988. Now full-time and part-time students can all be chosen. Karas said that the college's policy is to allow a student representative to be chosen.

Also changed effective June 1988 was the term of office, from three to four years. Instead of four years, Karas said, the student rep will serve for two years. Karas will continue as student representative until the end of December 1988.

Representatives for the student rep will serve in September and voting will take place in December. The next representative will take office in January 1989.

With the change in term, Karas said, even though students are now four years old, the college will have a new representative.

Last year only full-time students were eligible to run, but that year many in attendance at the college election were not eligible to run for the representative.

One problem Karas said is that part-time students cannot represent the students of the college because they are only at

the college for three to nine hours a week. Full-time students, he said, are eligible for 25 hours a week and have a better chance to represent the students.

There is hope, Karas said, for full-time students to be elected to the board of governors in the coming year, which he expected to see in the coming year. Other representatives will be elected in the coming year.

The board of governors will be elected in the coming year, which he expected to see in the coming year. Other representatives will be elected in the coming year.

The board of governors will be elected in the coming year, which he expected to see in the coming year. Other representatives will be elected in the coming year.

## O'Neill wins \$100 scholarship

By Kathy Bonaldi

Chicago O'Neill is a student in the electronic engineering technology program at Central College. O'Neill's scholarship was won by the annual Peter J. O'Neill Scholarship of \$100.

O'Neill, formerly a student and head of student council at the College of Arts, presented the award to O'Neill during a presentation at the beginning of the year.

O'Neill was nominated by the appropriate teachers of the college.

John O'Neill was the only person to win the scholarship. He was nominated by the appropriate teachers of the college.

O'Neill said the scholarship is given to a student who has completed the academic requirements for the electronic engineering technology program at Central College and who is a full-time, part-time student.

## Walsh rides again

Walsh's current  
music shows a  
new life.

By David Miller

Get Into It  
Get Into It  
Get Into It

There are no surprises on the Walsh's new effort, Get Into It. The record is still Walsh's old-fashioned rock, sort of English music with a distinctive twist to it.

Now, mentioning the English three days in a row is probably as tedious as listening along. Let's say the band is a style of music that Walsh can't let go of.

Walsh's new effort, Get Into It, is a collection of songs that are as much about the past as the future. It's a collection of songs that are as much about the past as the future.

## Biting the Big Apple

By David Miller

A Cannibal in Manhattan  
Vanna Janowitz  
Published by Ecco

In Vanna Janowitz's Manhattan, the story of New York City is told in a way that is both funny and serious.

Janowitz begins her book with a chapter on the island of New York, which is a very interesting look at the city's history.

Manhattan is a very interesting place to live, and it's a very interesting place to visit. It's a place that is full of life and energy.

They get married. All you will find there is a man and a woman who are in love.

A collection of photographs of people playing characters in the book (including a photo of the late Andy Warhol) gives the book a strange, dramatic look.

A Cannibal in Manhattan is a very interesting book, and it's a very interesting book to read. It's a book that is full of life and energy.

THE GOLDEN THROAT CHARMER, NOW ON DRAUGHT

## Veteran Doon electrician strives for excellence

By Esther Jancsar

After 17 years as an electrician at Conestoga College, Ed Smith (Doon) has probably changed hundreds of thousands of electrical wires of many power lines for many.

Doon can be found doing practically any type of electrical work on the Doon campus and at the St. Lawrence Festival Centre.

Smith is responsible for making repairs to replacing fluorescent light bulbs.

"It's the best job I can do and I'm enjoying it. That's why I'll stay here," says Smith.

"When in the present world, Doon could receive long his job."

"If you can keep it in shape, it's a good job. I'm glad to be here."

at the college," Doon said.

Smith is a veteran electrician for 17 years. He is a member of the I.E.E. (International Brotherhood of Electrical Engineers) and has been a member of the I.E.E. since 1971.

Doon is a member of the I.E.E. and has been a member of the I.E.E. since 1971.

## Conestoga recreation centre holds March children's camp

by Kathy Howlands

A March Break Camp at the Kenneth E. Hunter Recreation Centre, Conestoga College, Kitchener, helped to entertain 38 children from March 14 to 18.

Many nights, there was a potluck supper, and the number of children who attended this year's camp increased by 30 from last year.

The camp offered children a

variety of "active and passive activities," including a variety of games, movies, arts and crafts, canoeing, skating, swimming, and fishing. There was also a "Movie Day" and "Basketball Day." The camp was held on an all-day basis in the Hunter Centre, Kitchener, on March 14.

One of the children who attended the camp was 14-year-old single mother's son, Michael. He said he enjoyed part of the camp, and enjoyed the games going to the

School Centre and meeting all the other children and campers.

"The hardest day was I don't know my parents because they are in California," Michael said.

Michael said the camp was fun, and that he should not go and be dropped by his mother. Camp costs were

the same as last year - \$20 for one child and \$30 for two children in the same family.

Nights and only some campers will be able to attend this year's March camp, based on availability by hotel and the other campers.

Michael Wagner and Mark Burt, two of the camp organizers, said the camp was enjoyable part of the camp was meeting the children and having fun with them.

Nights and two nights campers will be available to attend July 4 to Aug. 20.

The summer camp will cost \$20 for one child and \$30 for two children in the same family. The camp will be held on 14- to 18-year-olds and \$115 for child, \$115 for two children and \$115 for three children in the same family.

### Ringette champions

Conestoga won the second annual women's ringette tournament at Hunter College March 11 for the second year in a row. From left, Susan Brooking, Vicki Smith, Jill Dickson, Leahy Carley, Sheri Lee, and Joanne Smith.

By John McCurdy

Conestoga ringette won the second annual women's ringette tournament held at Hunter College March 11.

It was the second year in a

row that Conestoga won the tournament.

The two Conestoga teams won all three games in the final games, and made the final game a 1-0 victory over the other team.

## St. Pat's night draws 60

Pat and Mary's band played during the night. Parents' sports night on March 11 at the St. Patrick's Night.

March 11, Conestoga college students attended.

In the three weeks offered,

the school was open to all students. In the three weeks offered, the school was open to all students.

Children gathered around the game board for the camp activity.
